Inspireleap

01/2026 – 03/2026

Remote

Achievements/Tasks

- Developed and deployed web applications using MERN stack (MongoDB, Express.js, React.js, Node.js)..
- Utilized Generative AI tools and modern development practices to enhance UI and optimize development workflow.

Data Analyst Internship

Pantech.ai

11/2025 – 12/2025

Remote

Achievements/Tasks

- Worked as a Data Analyst Intern, utilizing Python and MySQL to collect, clean, and analyze large datasets for actionable insights.
- Developed efficient data queries and automated analysis workflows, improving data accuracy and supporting data-driven decision-making.

EDUCATION

Bachelor of Technology in Computer Science

United college of Engineering & Research
Allahabad

10/2023 - Present

7.6 CGPA

Intermediate

SSVM Inter College

06/2021 - 06/2023

78%

High School

SSVM Inter College

06/2019 - 06/2021

88%

SKILLS

React

Python

JavaScript

Express.js

Generative AI

MySQL

Node.js

MongoDB

SpringBoot

GitHub Copilot

C++

Data Structures and Algorithms

PROJECTS

Employee Management System

- Built a web-based system to manage employee records, roles, and attendance.
- Created REST APIs and connected the application with MySQL.
- Implemented structured data handling for efficient record management.

Royal Rasoi Restaurant Website

- Developed a responsive restaurant website with an interactive menu and online ordering features.
- Implemented user-friendly interface and seamless frontend-backend connectivity.
- Managed data efficiently using MongoDB for orders and customer details.

ACHIEVEMENTS

Participated in Workshop on Recent Trends & Technologies organized by UCER in association with IEEE Student Branch

Selected participant in U-Hack 3.0 Ideathon at United College of Engineering & Research

Attended Full Stack Web Development Internship Program Session by Edureka

LANGUAGES

English

Full Professional Proficiency
